ᆫ	PLAN IS ADEQUATE: A comprehe	ensive plan review ha minimum requiremo	_		termined that the plan					
	_	-								
	Please refer to additional informa		0.							
	Submit Notice of Intent (NOI): At	2.0			-					
	of Environmental Management. Co of the NOI must also be sent to the I				ittai of the NOI. A copy					
	of the NO1 must also be sent to the 1	teviewing Authority (6	e.g. SWCD, DIVK)	'• 						
	A preliminary plan review has been c	ompleted; a compre	hensive review w	ill not be completed	within the 28-day					
	review period. The reviewing authori	·		nprehensive review a	at a later date and					
	revisions to the plan may be required	evisions to the plan may be required at that time to address deficiencies.								
	☐ Please refer to additional information included on the following page(s).									
	■ Submit Notice of Intent (NOI): Attach a copy of this cover page when submitting the NOI to the Indiana Department									
	of Environmental Management. Construction activities may begin 48 hours following the submittal of the NOI. A copy									
	of the NOI must also be sent to the Reviewing Authority (e.g. SWCD, DNR).									
╚	PLAN IS DEFICIENT: Significant deficiencies were identified during the plan review.									
	☐ Please refer to additional information included on the following page(s).									
	☐ DO NOT file a Notice of Intent for this project.									
	☐ DO NOT commence land disturbing activities until all deficiencies are adequately addressed, the plan re-									
	submitted, and notification has been received that the minimum requirements have been satisfied.									
ᄖ	☐ Plan Revisions ☐ Deficient Items should be mailed or delivered to the Principal Plan Reviewer identified in the Plan Review Section above.

Construction/Stormwater Pollution Prevention Plan - Technical Review and Comment (Form 1)

	Project Name: Date Reviewed:						
The Pre med by d for incl incl and Res	teceven usur oth oth udi pro sta	chnical review and comments are intended to evaluate the tion Plan for the project. The Plan submitted was not rese included in the plan, as well as those recommended in talified individual with structural measures designed by er local, state, or federal permits that may be required to ing design calculations may be requested to further evaluations to the posed stormwater pollution prevention measures and the indards set forth in the "Indiana Stormwater Quality Marces, Division of Soil Conservation or similar Guidance In	revien the a quate ose consumer os	e coulif alif oced the refe l" fr	If for the adequacy of the engineering design. All omments should be evaluated as to their feasibility fied engineer. The Plan has not been reviewed ed with this project. Additional information, Plan. Prenced in this review must meet the design criteria rom the Indiana Department of Natural ents.		
Please direct questions and/or comments regarding this plan review to: Please refer to the address and contact information identified in the Plan Review Section on page 1.							
TI.	Assessment of Construction Plan Elements (Section A)						
The Construction Plan Elements are adequately represented to complete a plan review: Yes No The items checked below are deficient and require submittal to meet the requirements of the rule.							
A	1		A	1			
	1	Index showing locations of required Plan Elements		2	11 by 17 inch plat showing building lot numbers/boundaries and road layout/names		
	3	Narrative describing the nature and purpose of the project		4	Vicinity map showing project location		
	5	Legal Description of the Project Site (Include Latitude and Longitude - NOI Requirement)		6	Location of all lots and proposed site improvements (roads, utilities, structures, etc.)		
	7	Hydrologic unit code (14 Digit)		8	Notation of any State or Federal water quality permits		
	9	Specific points where stormwater discharge will leave the site		10	Location and name of all wetlands, lakes and water courses on and adjacent to the site		
	11	Identification of all receiving waters		12	Identification of potential discharges to ground water (abandoned wells, sinkholes, etc.)		
	13	100 year floodplains, floodways, and floodway fringes		14	Pre-construction and post construction estimate of Peak Discharge (10 Year storm event)		
	15	Adjacent landuse, including upstream watershed		16	Locations and approximate boundaries of all disturbed areas (Construction Limits)		
	17	Identification of existing vegetative cover		18	Soils map including soil descriptions and limitations		
	19	Locations, size and dimensions of proposed stormwater systems (e.g. pipes, swales and channels)		20	Plans for any off-site construction activities associated with this project (sewer/water tie-ins)		
	21	Locations of proposed soil stockpiles and/or borrow/disposal areas		22	Existing site topography at an interval appropriate to indicate drainage patterns		
	23	Proposed final topography at an interval appropriate to indicate drainage patterns					

	Construction/Stormwater Pollution Prevention Plan - Technical Review and Comment (Form 1)							
	Project Name:							
Da	Date Reviewed:							
	Assessment of Stormwater Pollution Prevention Plan (Sections B & C)							
			Sto	ormwater Pollution Prevention Plan - Construction Component (Section B)				
Adequate	Deficient	Not Applicable	В	The construction component of the Stormwater Pollution Prevention Plan includes stormwater quality measures to address erosion, sedimentation, and other pollutants associated with land disturbance and construction activities. Proper implementation of the plan and inspections of the construction site are necessary to minimize the discharge of pollutants. The Project Site Owner should be aware that unforeseen construction activities and weather conditions may affect the performance of a practice or the effectiveness of the plan. The plan must be a flexible document, with provisions to modify or substitute practices as necessary.				
			1	Description of potential pollutant sources associated with construction activities				
			2	Sequence describing stormwater quality measure implementation relative to land disturbing activities				
			3	Stable construction entrance locations and specifications (at all points of ingress and egress)				
			4	Sediment control measures for sheet flow areas				
			5	Sediment control measures for concentrated flow areas				
			6	Storm sewer inlet protection measure locations and specifications				
			7	Runoff control measures (e.g. diversions, rock check dams, slope drains, etc.)				
			8	Storm water outlet protection specifications				
			9	Grade stabilization structure locations and specifications				
			10	Location, dimensions, specifications, and construction details of each stormwater quality measure				
			11	Temporary surface stabilization methods appropriate for each season (include sequencing)				
			12	Permanent surface stabilization specifications (include sequencing)				
			13	Material handling and spill prevention plan				
			14	Monitoring and maintenance guidelines for each proposed stormwater quality measure				
			15	Erosion & sediment control specifications for individual building lots				
		Sto	rn	nwater Pollution Prevention Plan - Post Construction Component (Section C)				
Adequate	Deficient	Not Applicable		The post construction component of the Stormwater Pollution Prevention Plan includes the implementation of stormwater quality measures to address pollutants that will be associated with the final landuse. Post construction stormwater quality measures should be functional upon completion of the project. Long term functionality of the measures are critical to their performance and should be monitored and maintained.				
\mathbb{H}				Description of pollutants and their sources associated with the proposed land use				
	${\mathbb H}$		2	Sequence describing stormwater quality measure implementation Description of proposed post construction stormwater quality measures				
			3	Description of proposed post construction stormwater quality measures (Include a written description of how these measures will reduce discharge of expected pollutants)				
			4	Location, dimensions, specifications, and construction details of each stormwater quality measure				

5 Description of maintenance guidelines for post construction stormwater quality measures
